

DAILY
MAINTENANCE

Keep your
Countertops
Fresh for
Longer

1. Use a soft cloth to clean the countertop with warm water and a few drops of dishwashing soap. After giving the surface a thorough rinse with fresh water, pat dry with a gentle cloth.
2. You can make sure that your granite countertop is always easy to clean by taking quick care of accidents and food residue. Use microfiber cloths instead of abrasive materials and substances; they function well.
3. As soon as something spills on your tabletop, wipe it up with a paper towel or gentle cloth. Wiping the area can spread the spill, so avoid doing so.
4. Use dishwashing soap and warm water to completely saturate the spill, then rinse. Use a gentle towel to dry the spot.
5. Granite resists scratches quite well. However, using a cutting board is recommended to prevent
